As part of **BRICS Sustainable Lifestyle Week**, the Department of Science, Technology and Environment, Government of Puducherry, and Puducherry Pollution Control Committee (PPCC), invites you to a webinar on **"Mission LiFE – Save Energy"**.

The webinar aims to create awareness about the importance of energy conservation, responsible electricity consumption and the adoption of energy-efficient practices in our daily lives. The session will highlight how simple lifestyle changes, such as switching off unused electrical appliances, reducing energy wastage and embracing sustainable energy practices, can contribute to reducing carbon emissions and building climate resilience.

We warmly invite students, educators, professionals and all environment enthusiasts to participate in this awareness initiative and strengthen our collective commitment towards energy conservation and sustainable living.

With regards,
DSTE
Puducherry
